

## Convoy Protest CCG Meeting Minutes

Attendees: Jason Reynar, Chief Laforet, Shelby Askin Hager, Jelena Payne, James Chacko, Joe Mancina, Jason Moore, Deputy Bellaire, Ryan Lemay, Phong Nguy, Carolyn Brown, Chris Nepszy, Tyson Cragg, Jonathan Wilker, Andrew Teliszewsky, Matthew D'Asti, Emily Bertram, Susanne Hutnik

CAO: Thank you everyone for the incredible work over the last week. I'm proud to be the CAO of this city.

Deputy Bellaire: The bridge opened up sometime around midnight. East/west is all blocked off. Some don't like that. There is a buffer zone right now as we implement a tiered safety evaluation for a while. This will be done until we figure out what may happen or we can escalate easily.

Chief Laforet: Working our WFRS routing. Can we cross at College east/west?

Chris: Yes at College and Tecumseh.

Emily: It is College, Tecumseh and Industrial that will be able to be crossed east/west.

Deputy Bellaire: There will be new messaging, public facing. We will get the confirmation of closures soon.

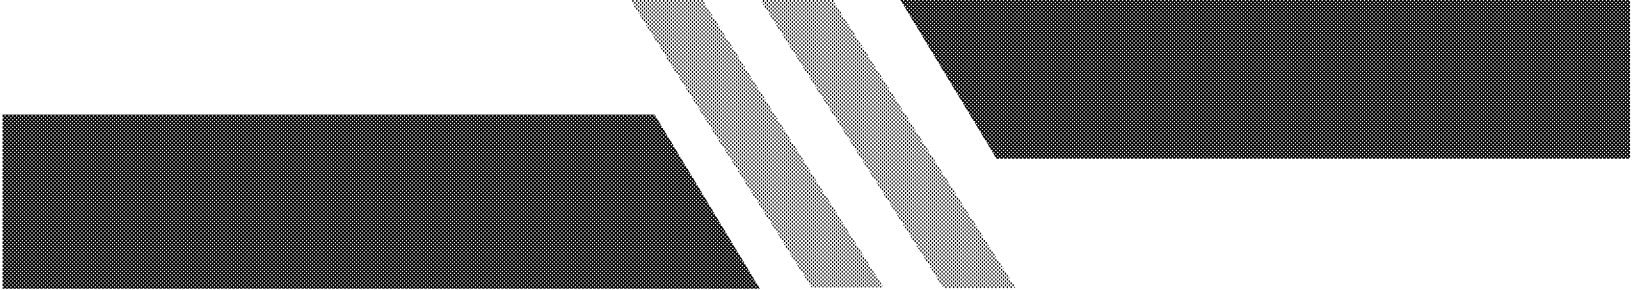

Chief Laforet: Finalizing details for emergency services. Will be moving those vehicles out when permanent barriers are available. With way the EOC was used, it was invaluable. The job that the police did and the city support was really something to see.

CAO: This shows how vulnerable we are to traffic, as a means to protest. Want to give a global level across the city on transportation infrastructure over the coming weeks. Emily has taken 24/7 response to another level. We appreciate your work.

Andrew: Received some reactions to some stuff that happened last night so Shelby is requested to stay on the call afterward.

CAO: Police to provide update at council meeting with resolutions to keep council engaged.

Chris: Transit down to 7am-7pm service and we are able to support that. That was reduced this morning. As far as roads, signage and openings, we did a tour last night.

Proper signage and communication are being put in place: There are no pedestrian crossings. How to cross? How do the stuck trucks get out of there? Coordinating with OPP on that. Signage is going to be key once people start to flow through. OPP has messaging on the 401 from London now. Things are going ok with more traffic direction being provided by officers. We need to know what the message boards need to say. Will be monitoring to make changes as needed with signs. Who will be moving the barricades later?

Phong: We are maintaining winter control and working around the barricades. Police working with us to get trucks around. This morning the traffic was fairly fluid.

Tyson: Down to 5 buses per day 7am-7pm for officer transport and comfort. They have got some Badder buses also and we are keeping track of the costs. Currently 5 buses staged at Industrial and awaiting directions.

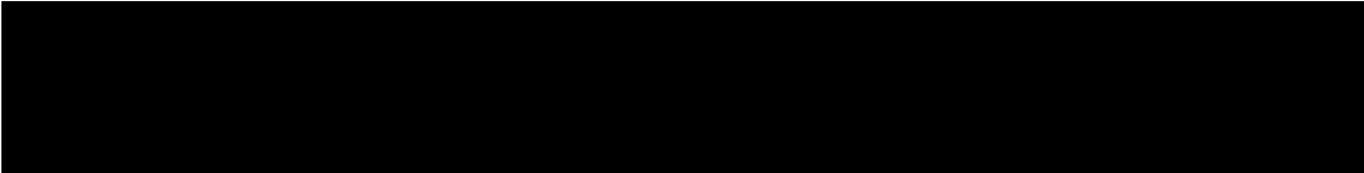

CAO: Use the tracking codes from Finance.

Shelby: Dana is making everything happen that you need to happen for Fire, Police, Transit, etc.

Carolyn: Traffic flowing smoothly at the tunnel. Still have one cruiser on site at Park St. At the height, we had 3 cruisers there.

Tyson: There is a bus staged at the tunnel. Are we leaving it there or can it be removed?

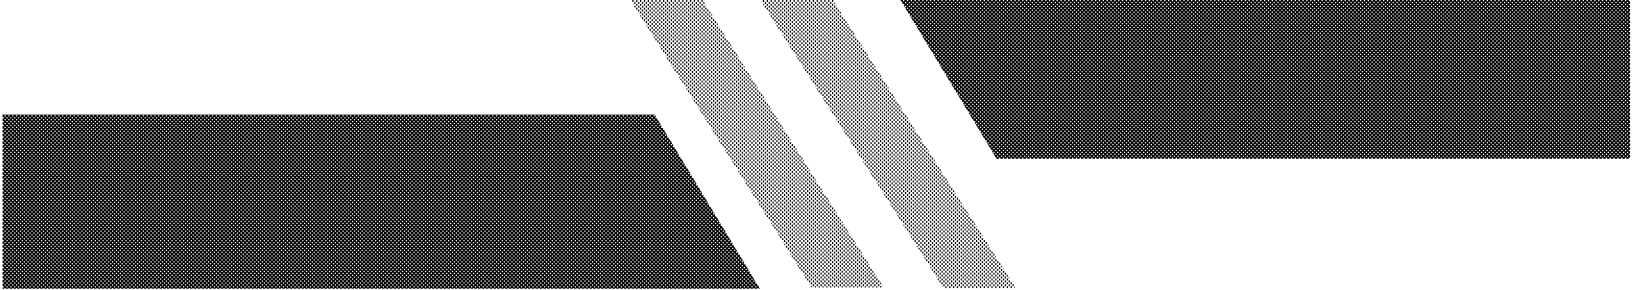

Deputy Bellaire: Leave it there just to be sure.

Chris: In a few days once pedestrians want to use that area, we will need messaging for our own residents on where to cross. The side roads will take a hit in the meantime. Some industrial vehicles will be on not normal roads. Plus the University as students will want to go from HK to McDonalds.

Jason M: You can give me the details so I can release it.

CAO: Send someone to the EOC today to get traffic and pedestrian information. Mapping and communications needed from the EOC for our website.

Jason M: We have been sharing what they put out so we do not step on anyone's toes.

CAO: Business access issues for Huron Church.

ROUND TABLE:

Ryan: EMS deployed 6-7 resources 24/7 since Thursday. That has been reduced to 2-3 now. Hospitals are doing well. For 511 service, those responsible, if they can update it as soon as possible.

Chief Laforet adjourned the meeting at 0920 hours.
